Art Unit: 1746

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 16, and 17, drawn to a laundry machine drum, classified in class 68, subclass 3R.
 - II. Claims 10-15, drawn to a method of forming a perforation in a laundry machine, classified in class 29, subclass 896.6.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made without a punch and die; the product could be made by molding.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip R. Coe whose telephone number is (703) 308-1273. The examiner can normally be reached on Monday-Friday, first Friday off.
